MERN Stack Web Developer - 2023
- Ibn Tofail University
bachelor degree - 2015
- Al-Fath High School
High School Degree - 2012

About Me

Experienced MERN stack developer with a passion for crafting seamless web and mobile applications. Proficient in MongoDB, Express.js, React, and Node.js, I bring a strong foundation in full-stack development. Skilled in creating responsive and dynamic user interfaces, optimizing performance, and implementing robust backend functionalities.

Professional Experience

Freelance (Digital Guru Website) - present

MERN stack website is the ultimate destination for buying and selling digital products. Powered by MongoDB, Express.js, Node.js, and React.js, our platform offers a seamless experience for users. Browse a wide range of digital products, from software to e-books, with secure payment processing integrated for smooth transactions. Sellers benefit from a user-friendly dashboard to manage listings and track sales. Join us today to explore and discover the best in digital offerings.

Freelance (Bella Shoes Website)
Mars 2023 - Dec 2023

This project is an e-commerce website designed for selling shoes. It utilizes the MERN stack, comprising MongoDB as the database, Express.js and Node.js for the server-side, and React.js for the client-side. The website allows users to browse, search, and purchase shoes online, with features such as product listings, user authentication, cart management, and checkout functionality.
